

Local Fitness Champion

Teaching physical education is a lifelong ambition for **Joanne Osborne**. In the classroom and through volunteer after-school programs such as snowshoeing, basketball, soccer and ice-skating, her students have every opportunity for daily physical activity. Joanne applies cutting edge programs and techniques, and may be the only elementary teacher in Alaska using large therapy balls and digital camera technology to capture proper movement forms in action. She personifies professionalism, compassion and boundless energy for increasing her students' abilities and drive for fitness. Her compassion and devotion to student health and fitness is unmistakable, and through her efforts, Klatt students will realize their capabilities and embody a healthy future.
